DESIGN

Unlimited possibilities and creating with passion characterize us. How does it work?

We are looking for inspiration and sometimes it finds us. Inspiration comes unexpectedly on the road, in the mountains, in the forest or in the museum, but also in our dreams while we sleep. It sketches in our heads what we then put on paper. This is how our new front door models are created. Each model can be personalized as desired. We want to inspire you about the endless possibilities that lie ahead. Be a part of it. Your task is only to find your dream front door, which will inspire you.

www.pivotdoors.de/en

The manufacturer reserve the right to introduce changes to product design and dimensions, as well as minor technological modification aimed at improvement of the door quality or functionality, without notice to the customer. Photos, dimensions and colours presented in the catalogue may differ insignificantly from the actual ones due to differences between printed version and the actual situation. The use of original colour chip charts rather than of the catalogue printout is recommended for selection of the colour or the sheathing material.
